

Open your iPhone Safari browser or your BlackBerry browser on this page:
<https://myaspect.net/m>

Your username and password are the same and once you log in you will see 3 options – click on the [Futures](#) link

The system will open and display the ICE Brent futures, click on the dropdown box to select ICE Gas Oil, Heat or a composite Nymex page.

To add additional data, click on the [EDIT](#) button on the right. This will allow you to then select data from the exchanges you are permitted for.

You can now select the data you want, click on the exchange you need under the real time or delayed headings and this will show a list of the available symbols.

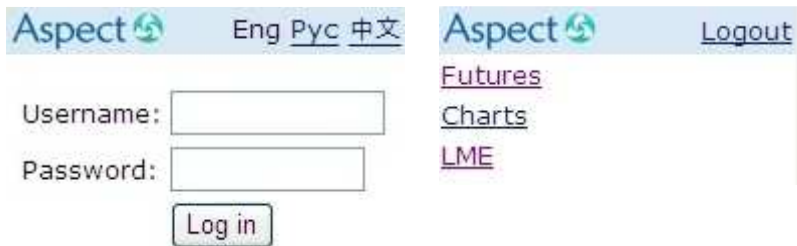

Click into the box to select the actual data feeds you want to see and then click OK.

This will take you back to the exchange list and you can then select data from other exchanges.

Finally at the bottom of the exchange list you can select the frequency of update.

You are now ready to use the service, just click the dropdown to change data feed.
